Full-stack engineer with startup founding experience, hands-on across architecture, backend implementation, and AI system design.

EXPERIENCE

Co-Founder & Interim CTO (Hands-on IC + Architecture) — BeyondBrain

Taipei, Taiwan | Feb 2024 – Jun 2026

- Co-founded BeyondBrain and built **Lumi, an AI travel planning platform, from scratch as founding full-stack engineer**, architecting the **platform** and AI application flow while integrating hotel inventory across **1M+ properties** and Google Maps-based POI discovery, helping secure seed funding.
- Architected Lumi's core planning system, separating a **non-deterministic LLM planning layer** from a **deterministic transaction layer** that re-validates pricing before booking confirmation, reducing failures caused by free-form LLM outputs through streaming responses and structured outputs.
- Designed and built a normalized relational data model and **RBAC-based user management system** for **FifthKeys, a hospitality management platform**, separating availability, reservations, and pricing to ensure transactional consistency and real-time channel synchronization, helping client hotels increase occupancy by **20%+**.
- As Interim CTO, coordinated **Web, Flutter, and Backend** teams, established engineering practices, and hired **6 engineers**.

Full-Stack Engineer — MixerBox

Taipei, Taiwan | Jun 2021 – Feb 2024

- Owned backend architecture, API development, and AI interaction flow for **MixerBox ChatAI's** tool-orchestration system, a production AI infrastructure serving **2.4M+ daily requests** and **9,000 peak RPM**, with robust handling for API timeouts, malformed LLM responses, and context failures.
- Engineered concurrency-safe purchasing workflows for **MixerBox Pay, a digital commerce platform**, using **DynamoDB Transactions** to prevent race conditions during high-concurrency limited-quantity, fixed-time releases.
- Built authentication and user-management systems for **MixerBox ID**, a centralized identity platform with **1M+ users**.
- Monitored production systems via AWS CloudWatch and took part in **on-call rotations**.
- Joined as the company's **first full-stack engineer** and helped define engineering standards and interview processes as the team scaled.

IT Intern — Funpodium

Taipei, Taiwan | Jul 2020 – Feb 2021

- Built an internal admin console modeled on **AWS IAM** for access control, developed the company's website using **React.js** with a custom backend CMS, and built a social-network side project to explore full-stack patterns.

IT Intern — Gridwell

Taipei, Taiwan | Jul 2019 – Jun 2020

- Developed monitoring dashboards for **Taipower's** internal electricity operations team, a small but business-critical system, prioritizing reliability and data accuracy, and built **Python** analysis scripts and **SQL** schemas for internal reporting.

LEADERSHIP & ACTIVITIES

National Taiwan University CSIE — Taipei, Taiwan

- Teaching Assistant, **Algorithms**, designing and grading coursework and holding office hours.
- General Coordinator, **CSIE Camp**, leading planning and execution of a department-wide event.

SKILLS

Programming:	TypeScript, JavaScript, Python, SQL, C++
Frontend & Backend:	React.js, Next.js, Node.js, NestJS, FastAPI
Database:	PostgreSQL, DynamoDB, MongoDB
Cloud & DevOps:	AWS (ECS, RDS, DynamoDB, CloudFront, Route53, CloudWatch), Docker, GitHub Actions, Jenkins
AI & Product:	LLM-powered applications, AI workflow design, AI agents, AI-assisted dev (Cursor)
Spoken:	English (Professional), Mandarin (Native)

EDUCATION

National Taiwan University — Taipei, Taiwan

B.S. in Computer Science and Information Engineering | Sep 2017 – May 2021
